FIGURE 14 is a cross-sectional view of a medical device, likely a catheter or probe. The device has a long, cylindrical body with a distal tip. The body is divided into several sections. On the left, there is a connector or handle section (70). The main body (60) contains internal components, including a central tube (90) and a surrounding sheath (82). A distal tip (65) is shown on the right, with a flared or expanded section (69). Various internal components are labeled with numbers: 91, 78, 90, 20, 82, 92, 62, 79, 84, 74, 65, 69, 72, 86, 94, 96, 67, 71, 86, 70, and 60. The device appears to be designed for minimally invasive surgical or diagnostic procedures.
